10 REASONS FOR A CARBON TAX

OMNI350 Meeting

1:30 -3:00 PM Sunday, 7 July 2013

Walker Room, Fayetteville Public Library

A short video of Dr. Shi-Ling will talk on the 10 (ten) reasons we need a carbon tax. This will be followed by dialogue on the best strategies to promote the adoption of a carbon tax in the US.

Shelley will also give a brief report on her recent trip to Washington, DC for the Citizens Climate Lobby conference. While there she was able to meet with all the Arkansas Congressional delegation, except Rep. Crawford.

WHY 350?

Our Newsletter, 350PPM (parts per million concentration of carbon dioxide in the Earth's atmosphere) seeks to educate the public about the impending crisis of global warming and climate change. We must reduce greenhouse gas emissions and return the levels of CO₂ in the atmosphere to no more than 350 parts per million. It is only at these levels or below that the climate and environmental systems of the earth as we know them can be maintained. As a point of reference it was 1988 when the earth's atmosphere contained 350 PPM of CO₂.
