• Joseph W. Ashy,
• Commander-in-Chief of US Strategic Command
Star Wars is no longer science fiction

The prospect of Earth being ruled from space is no longer science-fiction. The dream of the original Dr. Strangelove, Wernher von Braun (from Nazi rocket-scientist to NASA director) has survived every US administration since WW2 and is coming to life. Today the technology exists to weaponize space, a massive American industry thrives, and nations are maneuvering for advantage.

PAX AMERICANA tackles this pivotal moment. Are war machines already orbiting Earth? Can treaties keep space weapons-free? Must the World capitulate to one super-cop on the global beat?

With startling archival footage and unprecedented access to US Air Force Space Command, this elegant, forceful documentary reveals the state of play through generals, space-policy analysts, politicians, diplomats, peace activists, and hawks.
