25 July 2014

Essential role of biodiversity and ecosystems for sustainable development recognised in Sustainable Development Goals

Biological diversity and ecosystems featured prominently in the proposal of a set of 17 Sustainable Development Goals (SDGs) that the Open Working Group on Sustainable Development Goals of the 68th session of the United Nations General Assembly agreed by acclamation to forward to the General Assembly, setting the stage for better links between the implementation of the biodiversity agenda of the Convention on Biological Diversity, and the post-2015 sustainable development agenda.

RECENT VIDEO

São Tomé was once the world's biggest exporter of cocoa, but a decade ago the global cocoa price crash destroyed the industry here and desperate farmers have been clearing the forests to find alternative ways to make a living. But then the rising global demand for organic chocolate changed everything. IFAD joined forces with French organic chocolate company, Kaoka, to revive the island's cocoa industry. And it looks like chocolate might just save this island.  http://www.ifad.org/
